

Processing, Arduino, & Sensors

IMPORTANT:

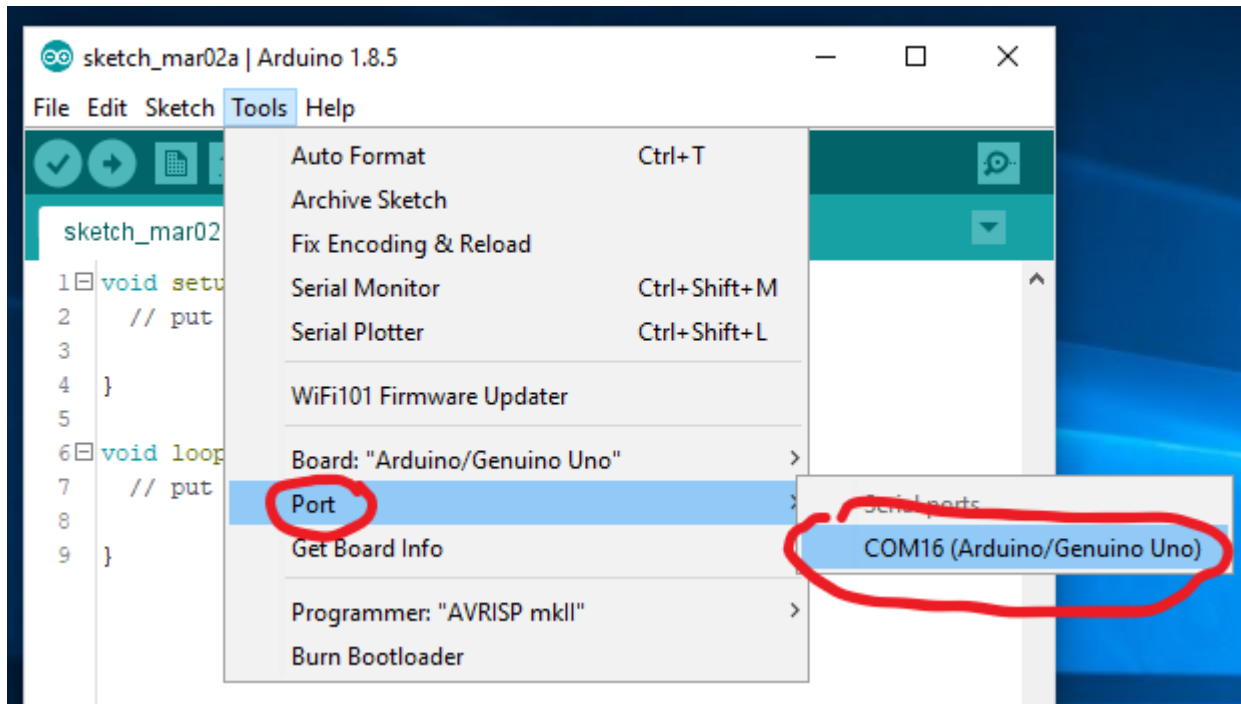

- Disconnect your Arduino from the computer before wiring any circuits.
- Follow the circuit diagrams closely.
- After plugging in the Arduino to the computer via USB, choose the Board and Port from the Tools menu before uploading.
- Do not disconnect the Arduino while uploading.

Before Uploading

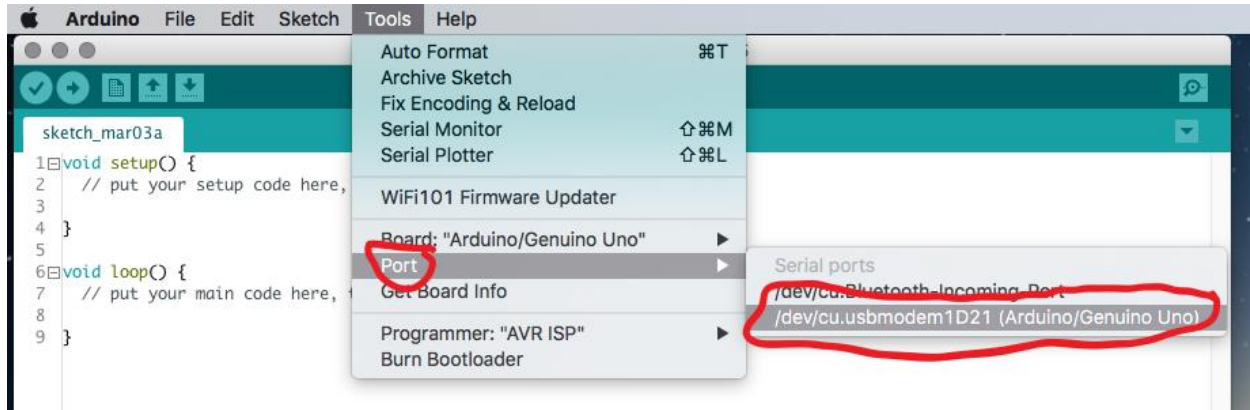

- After connecting the USB cable:
 - Choose the Board from the Tools menu

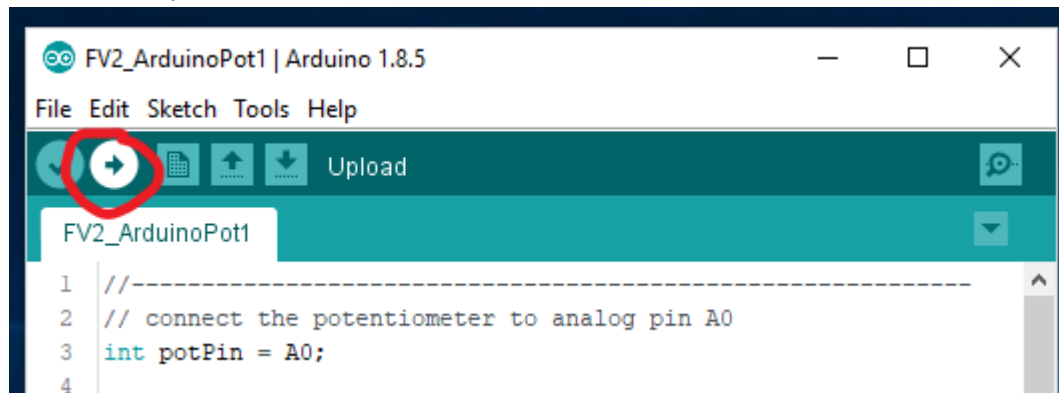

- Choose the Port from the Tools menu:
 - (COM on Windows)

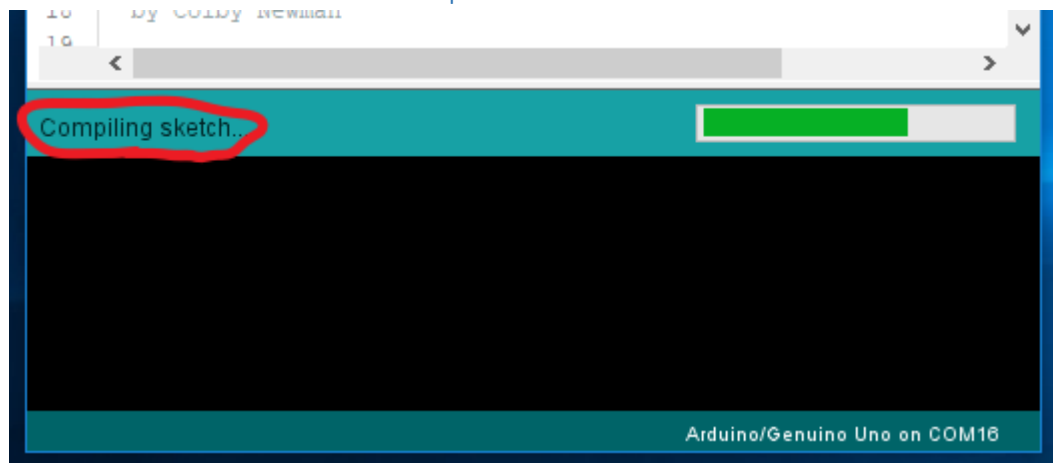

- (usbmodem on Mac)

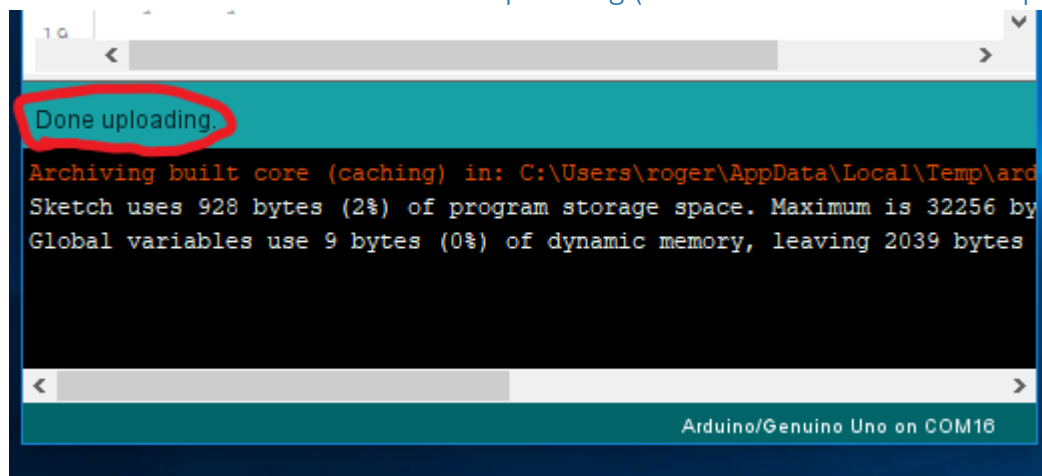

- To Upload Code to Arduino

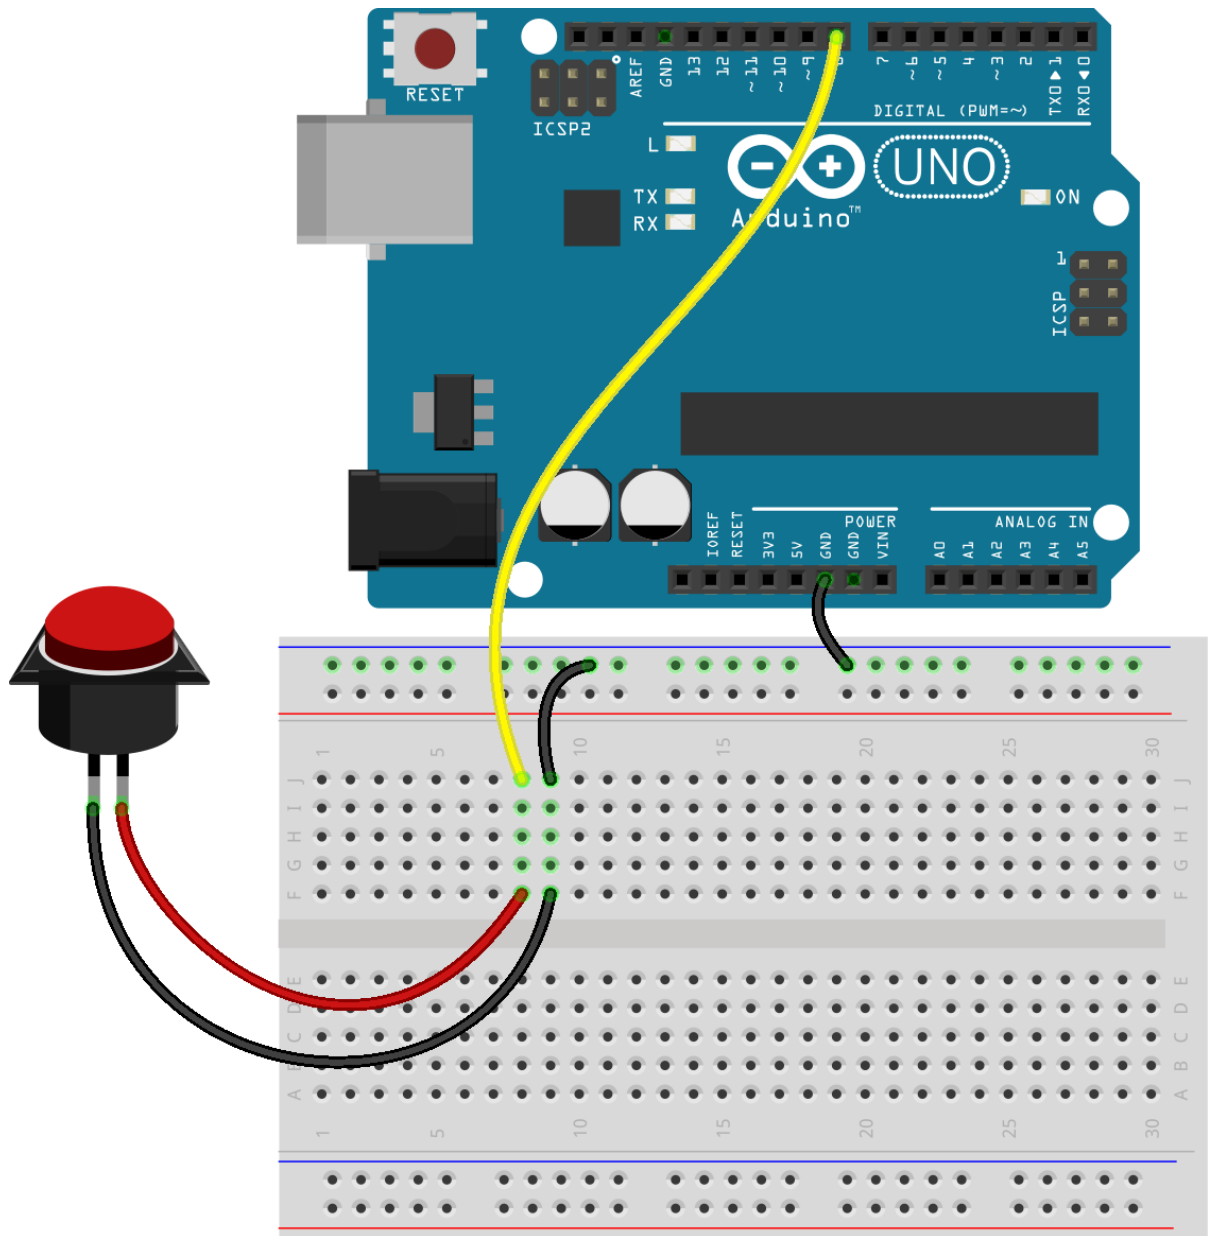

- Wait while it Compiles...

- Wait until it is Done Uploading (Do Not Disconnect While Uploading)
